Abdullah Ismail

Full-stack developer

Al-Ula, Saudi Arabia · +966 51 004 2472 · abdullah.ismail.pro@gmail.com · github.com/som3adev-byte

SUMMARY

Full-stack developer at a company in Al-Ula, where I built its accounting and operations systems end to end, alone, with Next.js, TypeScript and PostgreSQL, and I run them with the staff: I write the business rules with each department, moved the company off Excel, train and support the users, and handle IT and administration. My accounting degree shapes how I model money, payments and audit trails.

EXPERIENCE

IT Specialist & Web Developer, Ashar Company, Al-Ula, Saudi Arabia

Jan 2025 – Present

- Built the company's internal software end to end, alone: an accounting system for its tourism arm and an operations system for its hotels, staff and stock.
- Sat with each department and wrote how the work actually runs (approvals, shifts, deductions, payroll) into the specification before building.
- Moved the company's records and opening balances off Excel, and ran both side by side until the numbers matched.
- Train the staff on the systems and support them day to day, from reception to HR and accounting.
- Handle the company's IT and help with administration: devices, network, accounts and permissions, and reports for management.

Freelance Wholesale Digital Products Coordinator, Self-employed

2022 – 2024

- Recorded sales, tracked invoices and followed up on payments.

Military Service, Egypt

2020 – Dec 2021

- Mandatory service.

SELECTED PROJECTS

Ashar operations system

Employer · Oct 2026 – present

Staff, GPS attendance, payroll, bookings, stock and tax invoices for a hotel and trading company; 94 data models, about 185 tests.

Next.js 16 · React 19 · TypeScript · Prisma 7 · PostgreSQL

Ashar accounting

Employer · 2026

Replaced Excel for a tourism company's accounts; in daily use since May 2026, with Arabic PDF and Excel reports.

Next.js 16 · TypeScript · Prisma 7 · PostgreSQL (Neon) · Zod

Mizan

Independent · 2026

Compliance platform for the Saudi ECC-2:2024 controls: database-level tenant isolation, mandatory 2FA, 103 tests, open source.

Next.js 16 · NestJS 12 · PostgreSQL 17 · Prisma 7 · next-intl

Laundry pickup and delivery

Client · Oct – Nov 2026

Dashboard, driver app and customer app for a Saudi laundry, sharing one rules package; 2FA and an offline field app.

Next.js 16 · Drizzle ORM · PostgreSQL · Expo 58 · React Native

More work, with screenshots and case studies: F6 Media, Code Cut Click, Gesture-controlled 3D experience at localhost:3000

SKILLS

Web	Next.js, React, TypeScript, Tailwind CSS
Back end	PostgreSQL, Prisma, Drizzle, NestJS, Zod, row-level security
Mobile	Expo, React Native
Quality	Vitest, Playwright, GitHub Actions
Hosting	Vercel, Neon, Docker
