ABDULLAH ISMAIL

FULL-STACK DEVELOPER · BUSINESS SYSTEMS

abdullah.ismail.pro@gmail.com +966 51 004 2472 Al-Ula, Saudi Arabia github.com/som3adev-byte

> **Portfolio localhost:3000** · case studies, screenshots and code for every project below

I build the systems a business runs on, then run them with the people who use them. At Ashar Company in Al-Ula I built the accounting and operations systems end to end, alone, wrote their rules with each department, and moved the company off Excel. An accounting degree shapes how I model money.

EXPERIENCE

IT Specialist & Web Developer, Ashar Company, Al-Ula — Jan 2025 – Present

- Built the company's two systems end to end, alone: accounting for the tourism arm, in daily use since May 2026, and a new operations system for the hotels, staff and stock (HR, GPS attendance, payroll, bookings, invoices), built and tested and preparing to go live.
- Wrote the business rules with each department before building, then moved the records and opening balances off Excel and ran both side by side until the totals matched.
- Train and support the staff from reception to HR and accounting; run the company's IT, accounts and permissions, and management reports.

Earlier: freelance digital products coordinator: sales records, invoices and payment follow-up (2022 – 2024) · military service, Egypt (2020 – 2021)

SELECTED WORK

Ashar operations system EMPLOYER — case study →

Staff, GPS attendance, payroll, bookings, stock and tax invoices for a hotel and trading company; 94 data models, about 185 tests.

Next.js 16 · React 19 · TypeScript · Prisma 7 · PostgreSQL
